Address: 60326, Frankfurt am Main, Germany (Home)

WORK EXPERIENCE

DATA SCIENTIST / MACHINE LEARNING ENGINEER – AI VARIANT – 28/06/2023 – 28/03/2024 – PUNE, INDIA

Developing and deploying various machine learning models right from basic classification & regression (simple & multi-linear regression, SVM, random forest, etc) to hard core neural networks and clustering algorithms (ANN,CNN,KNN,RNN, newton & quasi-newton algorithms, K-means, DBSCAN, agglomerative clustering, etc).
Python based programming with various compilers (PyCharm,Jupyter NB, Google colab, etc).
Deployed numerous recommendation systems with historical and real-time user data.

MANAGEMENT ASSISTANT – NICKUNJ GROUP OF COMPANIES – 01/2022 – 03/2022 – PIMPRI-CHINCHWAD, INDIA

I was part of the managerial team of the manufacturing department, I looked into all the tasks deeply and monitored for any assistance from the managerial team.

EDUCATION AND TRAINING

03/2025 – CURRENT Hof, Germany
MSC. ARTIFICIAL INTELLIGENCE AND ROBOTICS Hochschule Hof

2019 – 2023 Baramati, India
BACHELOR OF ENGINEERING (MECHANICAL) WITH HONOURS IN ROBOTICS Savitribai Phule Pune University

SKILLS

Artificial Intelligence | Machine Learning | Neural Networks | Python (Tensorflow, PyTorch, NumPy) | Data Science | Software libraries (OpenCV, PCL, Tensorflow, ROS) | Git | Deep Learning | Data Analysis | Data Visualization | Gazeebo | MSoffice

PROJECTS

10/2025 – CURRENT
Neuromorphic Computing & SNN Benchmarking

Engineered a deep Spiking Neural Network (SNN) using PyTorch and LIF neurons via snnTorch, achieving 98.33% accuracy (surpassing the static baseline of 97.39%).
Optimized for event-driven efficiency, demonstrating 96.7% temporal sparsity and a 3.17 times reduction in theoretical energy consumption (2,477 nJ vs. 7,864 nJ per inference).

Link https://github.com/aryyanjadhav/Neuromorphic-AI-using-Spiking-Neural-Network

2025
Genesis v1.0

Developed a Streamlit-based chatbot using Python and the Google Gemini Pro API. The system processes user queries and generates detailed, context-aware responses through prompt-engineered instructions emphasizing specificity, accuracy, and minimal hallucination. Implemented an interactive web interface and API integration to deliver reliable, informative conversational AI assistance.

Link https://genesis-v10-vru7erougnjd8rcgr6m6vr.streamlit.app/

2025

Autonomous navigation simulation

Simulated autonomous robot navigation using ROS/Gazebo, incorporating LiDAR data processing.
Developed real-time obstacle avoidance logic for both static and dynamic objects.
Implemented path planning algorithms to navigate the robot to defined destinations within the simulated environment.

Link https://github.com/aryyanjadhav/Autonomous-navigation-simulation

2023

Driver drowsiness detection system

A 98% accurate driver drowsiness detector with an alert system. The eye aspect ratio of the driver is constantly monitored using the input camera, if the eyes are closed for a set threshold the alert system triggers and displays a warning on the screen along with an alarm.

Link https://github.com/aryyanjadhav/Driver-Drowsiness-Detection-System

2023

Drone detection system using YOLOv8 algorithm

A YOLOv8 algorithm based machine learning model with 90.4% accuracy at drone detection, though it be real-time, through images or videos. The model is fine-tuned using roboflow techniques and is deployed via the same platform.

Link https://demo.roboflow.com/anti-drone-system/1?publishable_key=rf_UisZ0O6uYPOqZ29dzb8yyAlPeQk2

2023

Intelligent Resume Classifier (ANN)

Resume classification model using Artificial Neural Network. This model precisely targets the keywords in the resumes and classifies the resumes. The model has an accuracy of 96%. This model is being used by the company AI Variant for their recruitment as well.

Link https://github.com/aryyanjadhav/Resume-Classification-System

2023

Personalized Recommendation Engine

A recommendation system which feeds on the individual user's historical data of binge watching, processes it via an artificial neural network and suggests a similar titles. The system not only analyses the title names, producers, directors and cast but also looks for the genre and plots. According to the test users, the accuracy of the model was almost cent percent.

Link https://github.com/aryyanjadhav/Netflix-Recommendation-System

2023

Energy Production Predictor

A 98% accurate linear regression model, which feeds on historical data of a power plant, even without finding a trend in energy production, the model accurately predicts the future energy generation numbers.

Link https://github.com/aryyanjadhav/Energy-Production-Predictor

HONOURS AND AWARDS

Gold Medalist in Product Design and Development – IIT Roorkee

Indian Institute of Technology, Roorkee in collaboration with National Programme on Technology Enhanced Learning had organised an exam in product design and development in which I secured 90% marks along with Gold + elite certification.

LANGUAGE SKILLS

Mother tongue(s): **MARATHI** | **HINDI**

Other language(s): **ENGLISH C1** | **GERMAN B1**
